

## **EASTFIELD RESOURCES LTD. REVIEWS CORPORATE AND PROJECT DEVELOPMENTS**

**Vancouver, B.C., October 31, 2025** – **Eastfield Resources Ltd.** (TSX-V: ETF) (“**Eastfield**” or the “**Company**”) is pleased to provide a corporate review and update on current exploration activities.

**Eastfield Resources Ltd.** is a **Tier 1 issuer** on the **TSX Venture Exchange**, having traded continuously since **1987** without interruption or share consolidation. Over this time, the Company has focused on the exploration of **precious and base metals** across **Western Canada and the Western United States**. Eastfield currently holds **five copper- and/or gold-focused projects**, all located in **British Columbia**.

The Company’s principal asset, the **100%-owned Zymo Copper-Gold Porphyry Project**, is located near **Smithers, British Columbia**, and covers **18,184 hectares**. Acquired in **2007** and fully optioned in **2012**, Zymo has seen more than **\$4.9 million** in exploration expenditures by Eastfield and former joint venture partners. Of major significance is an **8+ km by 2 km induced polarization (IP) anomaly** outlining a **copper-gold porphyry system** with multiple **one-kilometre-scale targets** and coincident **multi-element geochemical anomalies**. To date, **34 diamond drill holes (10,810 metres)** have been completed.

Mineralization occurs in **porphyritic diorites and adjacent sediments** exhibiting **strong potassic alteration**. Five mineralized zones have been identified, including the **Hobbes** and **FM Zones**. Significant drill results include:

- **ZY08-09:** 0.23% Cu and 0.32 g/t Au over 252 m, including 0.44% Cu and 0.32 g/t Au over 159 m and 0.72% Cu and 0.55 g/t Au over 72 m;
- **ZY08-10:** 0.31% Cu and 0.21 g/t Au over 159 m;
- **ZY11-20:** 0.28% Cu and 0.34 g/t Au over 126 m.

Peripheral precious-metal veins have also returned up to **10.78 g/t Au** with several percent **lead and zinc**. Numerous IP targets remain untested, and no deep holes have been completed to date.

The property features **flat to gently undulating terrain** with shallow overburden and **excellent access** via existing logging roads extending to its northeast boundary. In **December 2024**, Eastfield was granted a **five-year exploration permit** authorizing **50 drill sites** and **50 km of geophysical surveying**. A **2025 field program** of grid expansion and line-cutting is underway in preparation for a **2026 IP survey**.

In **September 2025**, Eastfield completed a **private placement financing of \$1.0 million**, welcoming a new group of enthusiastic shareholders and further strengthening the Company’s treasury for future exploration.
